

In the Easter term Junior Infants were lucky enough to have a 4<sup>th</sup> Year student teacher, Ms. Atkinson for four weeks. They had a fantastic time with her and were very sad to see her go.

They did lots of wonderful new things and here are just a few to show you. We learned about food and healthy eating and about where some of our food comes from. They even planted of their own!

We learned all about shapes in Maths. Squares, triangles, rectangles and circles and made some fantastic pictures using these 2D shapes.

When Mrs. Heath was back teaching us we started to learn about spring..... Even though it ended up snowing outside! We continued learning about where our food and looked at the work of the farmer. We also had a new role play area in aistear 'On the Farm' and they had great fun being farmers for the month.

Then we went on to look at transport for the month of March. We brainstormed all the ways we could think of for getting from place to place, some unusual ones too, like elephants, camels and quadbikes and blimps! We talked about the importance of being same on the road and in vehicles and learned 'The Safe Cross Code'. We should all be very safe road crossers now!
