

3rd Class

We have had a busy start to 3rd class. We made the most of the sunshine in early September with two trips to the beach. In our Science and Geography, we were looking at the beach as a habitat and enjoyed looking for various sea creatures. What a wonderful resource we have right beside us.

In art we have done a variety of drawing and painting. We especially enjoyed painting on stones and we painted a mini monster on these little glass stones before painting our big stones that we had collected at the beach.

For maths week we did some 'Tessellation Art' and 3rd class were extremely creative at designing their different animals.

We have also enjoyed exploring Mathletics on the ipads
specifically for Maths Week. We also completed a maths trail

As part of our PE we completed some activities from the 'Outdoor and Adventure Activities' strand. As well as simple orienteering we also did a variety of team building activities in our pods which were really enjoyable.
